Let THE COMPASS point  
your way to improved health!

- *Sick and tired of feeling sick and tired?*
- *Losing too much sick time from work or school?*
- *Feel like your kids are ALWAYS sick with something?*
- *Want to be proactive about your health now to avoid more serious health issues later on?*
- *Concerned about aging?*
- *Looking for more affordable health care options?*
- *Need accurate information about your body to point your way to better health?*
- *Tired of treating symptoms instead of getting to the root of the problem?*

**If you answered YES  
to any of these questions,  
we encourage you to read on!**

The COMPASS technology can change the health and wellness status of your family forever, enabling everyone to stay balanced and healthy, less likely to get sick, and less likely to miss time from work and school.

Selecting the nutritional supplements your body prefers through this bio-communication technology not only increases your health, but decreases your costs.

***Please note:*** *The COMPASS is not a medical device and does not treat, diagnose, or cure any disease. The information provided at the time of your COMPASS scan is for educational purposes only, to empower you to make personal changes that will improve your state of health.*

## ***Here's How The Compass Works***

ZYTO® technology is used by more than 5,000 doctors and health care providers to make decisions on the health care needs of their clients with 95% proven accuracy. Now that same technology is available in our natural health office, which we can easily use to accurately help you make decisions about your personal health and wellness program.

THE COMPASS makes health assessments simple – all you have to do is place your hand on a small hand cradle, about the same size as a computer “mouse”. The hand cradle is the interface between your body and a computer, which sends digital signals to your body and measures your body’s responses. Your body’s energy field responds to over 400 million bits of information per second. Zyto’s technology is able to read and measure your body’s response to digital signatures that indicate your body’s preferences to help bring it back into a state of balance, and consequently, improved health.

The Compass measures 76 bio-markers in your body, then records the bio-frequency of each marker to determine what is out of range or out of balance. Next, it gives you a picture of your out-of-range bio-markers. When the Compass registers the imbalance, it looks for the exact supplements that bring every one of those bio-markers back into range, or balance. Once those supplements have been calculated, the Compass then gives you a report on the supplements preferred by your body. The report will tell you which supplements bring a number of various markers back into range. Next, the computer prepares a professional report which contains a description of each supplement and what it does for the client, telling why it will correct a problem detected by the Compass. At the end of your consultation, the report will be e-mailed to your home. *(For those without e-mail, we can print the report for you in our office.)*

By combining a wellness consultation along with the Compass assessment, we can assure our clients of a personalized program that will produce results! Your consultation will include your Compass assessment, along with complimentary lifestyle recommendations.

No prior fasting or collection of body fluids is required. We will have some brief intake paperwork for you to complete prior to your scan. This equipment may be safely used by people of ALL ages, regardless of their current health condition.
